A Network-based Analysis of Technology-driven and Load-driven Constraints in Production Data

Serhat Kosif
Jacobs University

Spring Semester 2021

Feature Projection on Different Networks

Features to be Projected

Steel Grade Network with Single Data Points

Width Network with Constant Data Intervals

Table 1.1: Compact Production Lines with Various

No	Production Unit / Line	Descr
1	Continuous Casting Machine (CCM)	Steel cools, pa the mould solidifies after
2	Compact Strip Production (CSP)	Compact plant reheating furnace and strip pro
3	Pickling Line & Tandem Cold Mill (PLTCM)	Compact plan turbulence pi and a tan
4	Continuous Galvanizing Line (CGL)	Application of coating on the improve corros
